Hobbies

In my spare time, I am always looking to continually learn and grow my skills as a software developer. Enjoy being an active member in game development discord servers and helping others work through problems in their projects. Helping others is important to me and I think this gives me an opportunity to be the best developer I can be.

Profile

Upcoming university graduate with a Bachelor of Science in Game Development and Design, complemented by a minor in Computer Science. Solid foundation in React front-end development, coupled with a deep understanding of the software development lifecycle. Thrives in dynamic team settings and exhibits a strong willingness to be trained in diverse technologies. While specializing in game development using Unity and C#, I am keenly open to exploring and contributing to various technology domains. Award-winning developer of 'Chiba' – honored at Kennesaw State University Computing Showcase in Spring 2023. Seeking opportunities in an organization that values adaptability and offers avenues for professional growth through training and hands-on experience in new and familiar technologies.

Employment History

React Front-End Developer at Park `N Fly, Atlanta

JANUARY 2022 — JULY 2023

- Developed and launched 2 new React applications, successfully phasing out dependency on third-party solutions for operations facility operations across the United States.
- Played a pivotal role throughout the development lifecycle, including requirements gathering, verification and validation, and documentation. Excelled in managing user stories and fostering seamless communication among team members, ensuring project alignment with business goals.
- Significantly improved the user experience and performance of the company's legacy React Native application through strategic quality-of-life enhancements and meticulous bug fixing.
- Spearheaded the integration of Google Analytics using React Native Firebase, in collaboration with an external Data Science company. This integration provided valuable insights into user engagement and application performance, driving data-driven enhancements.

General Contractor at Leading the Way with Dr. Michael Youssef, Atlanta

DECEMBER 2020 — PRESENT

- Support operational needs, manage security, and facilitate live broadcasts. Operate technical equipment and software for event production.

Operations Supervisor / Shipment Research Validation Analyst at ABF Freight Systems, Dayton / Atlanta

JULY 2015 — DECEMBER 2020

- Oversaw terminal operations, led teams to enhance efficiency, and enforced compliance. Conducted research and implemented corrective actions to optimize logistics and reduce losses.

General Manager at P.S. MGMT Inc., Dayton

MARCH 2006 — JULY 2015

- Transitioned from a high school job to a managerial role, scaling business revenue from $600K to $800K. Managed daily operations, driving profitability and analyzing financial performance.

Education

Bachelor of Science Game Development and Design, Kennesaw State University, Kennesaw

DECEMBER 2020 — MAY 2024

Computer Science and programming focused course load. Current GPA 3.85.
